Patent Pending

No. 18400

The 18400 series T-Handle is designed to fit most existing T-Handle cutouts due to the innovative blind mount bracket designed for panel ranges of .03" to .125". Product features include an Ergonomic Handle design for a large grip, water-resistant construction, built in cylinder cover hidden below the handle grip, blind mount with no visible fasteners, Double-Bitted key cylinder with over-molded key, padlocking feature for " loop, compression roller cam for ease of operation and tight sealing. Gasket is pre-installed to the receptacle for ease of assembly and water resistance. Cylinder Plug ordered separately with removable plug design for ease of assembly – key series J201-J210

Available with key-cylinder set for Eberhard Power Up™ locking system – see chart  
 Available with Plastic Receptacle and Die Cast Handle 18500 series – see chart  
 Available in single, 2-point, and 3-point versions – see chart
