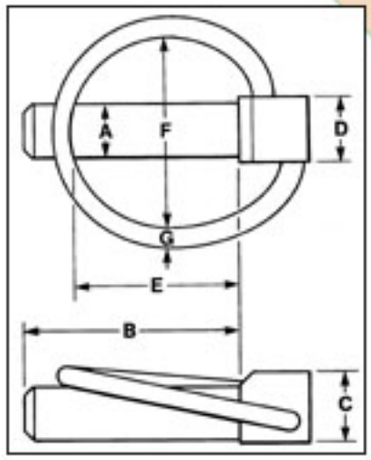
Lynch Pins

Pivot Point imports this high quality fastener direct from Denmark - no middlemen. Made to rigid standards, this is the highest quality standard lynch pin available. Made from 1010 carbon steel, zinc plated and yellow chromate dipped, this pin is especially corrosion resistant. The "over center" ring loop attached to the head snaps down hard to hold the fastener in place. A special heavy ring is also available for extreme applications.



Made in Denmark.
Available in high-strength alloy steel - heat treated.
