

Hair Pin Cotter

Material: Zinc plated steel

Hair Pin Cotters (or “R Clips”) are a spring-type cotter made to be reusable. Hair Pin Cotters are generally meant to be used in through-holes while Hair Pin Clips are generally meant to be used on a groove. Double Loop Hair Pin Cotters are also available.

Designed to be strong and secure, these fasteners are economical and widely used. It is important to select the correct size Hair Pins Cotter because misuse causes fatigue and will result in loss of the fastener.

Made from hard drawn MB spring wire, zinc plated and baked or Stainless Steel (300 Series).
