

## Magnetic Identification Pockets

### Description

Identify and visualize all stored goods or goods circulating in the logistics chain thanks to the magnetic identification pocket!

This very robust identification pocket enables all stored goods or goods circulating in the logistics chain to be identified and visualised.

Thanks to its 30 mm wide magnetic stripe, it can be fixed on all metallic surfaces.

### Technical characteristics

Available in 4 sizes: A4 or A5, in portrait or landscape.  
Available in 4 colours: yellow, blue, red or green.

One box contains 10 items.

### Product benefits

- Optimal flexibility and visibility: 4 ISO standard colours for signage by colour code (yellow, blue, red, green).
- 4 sizes: A4 and A5 in portrait and landscape.
- Solidity: high resistance PVC (350µ) with a reinforced upper section for frequent use.
- Top opening for quick insertion and removal of the document which remains protected.
- Width of the crate edge max. (for the hook): 50mm
- Cleanliness: the magnetic strip leaves no residue compared to adhesive fixing.
- Made in France (ISO 9001 and 14001 factory)
