

## Lashing Rail 206-2000

All aluminium lashing rails have a raster of 25mm. That means you can use any lashing bail, depending on the load requirement.

The lashing rails can be strained with up to 2.500daN (kg), the effective load capacity depends on the lashing bails from 300 to 2.000 daN(kg).

The common rail length is 2000mm.

**Size:** 2000 x 34,3 x 13 mm

**Material:** Aluminium

**Weight:** 1,80kg / rail

Centre Fixing

Large range of fittings/ bails available

Easy Fixing of all fittings

Weight rating depends on the fitting/ bail used
