

D.G.N. HINGES FOR RV

NEW HINGE 2962NB OPENING 130°

THE NEW 130° OPENING MEETS THE NEW GENERATION DOOR DESIGNS THAT BOTH IN CAMPERS AND CARAVANS REQUIRE A LARGER OPENING THAN 90°

POSITIVE STOPS

THIS NEW BASE APPLIED ON THE DOOR, HAS THE FOLLOWING ADVANTAGES:

1- THE WOOD INSIDE THE DOOR CAN BE REDUCED AT 30 mm IN THE UPPER PART WHERE THE HINGE IS APPLIED.

2- THERE ARE ADDITIONAL HOLES IN THE BASE APPLIED ON THE DOOR IN ORDER TO ALLOW A GOOD ADJUSTMENT AND A LONG-LASTING FIXING.

INTERNATIONALLY PATENTED

2962NB OPENING 95°

It allows a much wider covering of the door side
Where on the upper side you can assemble Led or other lighting devices.
Both for flat and for curved doors

2962NB OPENING 110°

2962NP OPENING 130° IN ITS VARIATIONS FOR
OPENING 110° WITH 2 mm PLATE

Insert a plate of thickness 2 mm supplied by DGN in the installation phase of the hinge that will work as a mechanical stopper.
The plate must be placed on the base of the hinge that is applied on the upright of the furniture.
In this way the hinge will be stopped at 110°

2962NB OPENING 120°

2962NP OPENING 130° IN ITS VARIATIONS FOR
OPENING 120° WITH 1,5 mm PLATE

Insert a plate of thickness 1,5 mm supplied by DGN in the installation phase of the hinge that will work as a mechanical stopper.
The plate must be placed on the base of the hinge that is applied on the upright of the furniture.
In this way the hinge will be stopped at 120°
